

BALTIMORE CITY HEALTH DEPARTMENT
MEDICAL DIRECTOR
SCHOOL HEALTH PROGRAMS
Pediatrics/Family Practice Preventive Medicine

The Baltimore City Health Department is seeking a board certified/eligible physician to provide clinical oversight and direction to a vibrant school health program that provides direct patient care in Baltimore City Public Schools. The position requires clinical expertise and experience in the following areas:

- Assessing and treating health problems and diseases in school-age children
- Provision of health care including reproductive health services to adolescents
- Medical consultation for school nurse supervisors
- Medical consultation for school-based health center clinical directors
- Serving as a preceptor for nurse practitioners who provide primary care services to students enrolled in school-based health centers
- Provision of medical services to students including those with special needs and medically fragile children.
- Developing medical guidelines and protocols for schools.
- Directing in-service education for School Health staff.
- Advising Baltimore City Public Schools administration regarding school health.
- Leading special initiatives on child and adolescent health
- Participating in emergency preparedness activities
- Assessing and treating medically-fragile and severely developmentally delayed children

Requirements: Maryland license, minimum of three years experience as a licensed physician including a minimum of one year in community health work, or training at a school of public health. Board certification in pediatrics or family medicine.

Interested persons should submit resumes and letters of interest to:
